Topic - The disadvantage of being sorrowful

In the Confluence Age, happiness is a great boon. The more someone stays happy in this *shooting period* of the Confluence Age, he will experience happiness for many births. And the one who stays sorrowful in spite of the arrival of God the Father, who experiences sorrow in the Confluence Age, he will experience unhappiness and troubles for many births. He no doubt receives the inheritance of 21 births, there is no shortcoming in it but when the Copper Age arrives, when other religious fathers come, when they start giving their own opinions, then because of coming under their influence, a human soul starts becoming sorrowful. So, the *shooting* is going on now. You can either amass happiness for many births or you can amass sorrow.
