

**Short No. 2, VCD - 225**

**Topic - You incur loss by staying sad in the Confluence Age**

Happiness is a very big boon in the Confluence Age. The more someone stays happy in this *shooting period* of the Confluence Age, he will experience joy in many births and the one who stays sad despite the arrival of God the Father, who experiences sorrow in the Confluence Age, he will experience sorrow, trouble in many births. He definitely receives the inheritance of the 21 births. There is no short coming in it. However, when the Copper Age commences, when the other religious fathers come, they start giving their opinions; by coming under their influence human souls start becoming sorrowful. So now, the *shooting* is taking place. Whether you increase the store of joy for many births or you increase the store of sorrow.
