Topic - The reason and remedy to all diseases

The Father has opened the spiritual *hospital*. The Father says: this mind is the seed. When this mind-like seed is healthy, your body will also become healthy. On the basis of the thoughts of the mind... The doctors also say: remember God then you will be all right! It means, they too don't have complete faith in their medicine, whether it will work or not. If God wants, you will get all right. Rely on God! This means that all illnesses begin from inside the mind. If the mind is healthy, the body will also be healthy. If the seed is healthy, the tree will be healthy as well. So, this body is just like a plant, a tree. And the mind, the soul in the form of the mind and intellect is the seed.
