

Short No. 95, VCD - 2417

Topic - Is the end of the world near?

There are many countries that have thousand megawatts bombs prepared. They have stored it safely underneath the earth in tunnels. They are sailing in the submarines of sea water and missiles are flying in the sky in aircrafts. They have engulfed [the world] from all the three sides. Isn't there a possibility that they start exploding? Have they been prepared for the decoration of our houses? They haven't.
