Topic - About jersey cows

Because among the animals, only cow is such an animal that has a simple cowlike nature. That too, not the foreign cows, the *jersey* cows. What have they been named? *Jersey (jara si)*; they are a little bit of cow and the rest, no one knows which breed they belong to. People are suffering from [various kinds of] cancer because of drinking its milk. Not a little amount of *ghee* can be extracted from it. These days, look all over India, do people foster *jersey* cows that give more milk or do they foster Indian (*desi*) cows that give one, two or three kilograms milk? (Student: *Jersey*.) Why? Because the foreigners have completely influenced the Bharatvaasis.
